

GALLARD

SERVICES

CONTRACTING SERVICES

Shaping your trees' future

• Hedging • Mulching • Transport • Roadside • Skirting • Ground Preparation

Gallard Services was established in 2002. After 30 years of being in the citrus industry John Gallard understood the need to service the Horticultural Industry with the latest equipment to handle the tasks in orchards that weren't able to be done efficiently. With John's knowledge of the industry customers could soon see the benefits of the latest equipment available to them, so as the demand increased Gallard Services expanded from their original 2 machines purchasing a variety of machinery which enabled them to cater for all the current pruning and development practices. With the ever advancing global technology Gallard Services saw the need to travel the world enabling them to keep abreast of these improvements and to allow them to meet the demands of not only the small local grower but the corporate syndicates and whether it is 5 or 500 hectares their maintenance needs on their properties were the same.

Gallard Services offer Hedging, Mulching, Skirting, Roadside Vegetation Maintenance, Almond Carting, Ground Preparation and specialised Machinery Transport Services.

Gallard services specialises in maintaining and upgrading all OHS procedures and practices and complies with all the legislations applied to their industry in all states.

Gallard Services will continue to expand as the market demands allowing growers to maintain their properties adequately using the latest technology which ultimately can increase productivity and efficiency.
